

Be a *firm* Believer.

Get back sexy, smooth contours.

Body Firm™ is specially formulated using natural extracts to improve the appearance of body contours. Ingredients work to target sagging skin that is caused by the weakening and loss of collagen and elastin in the skin. Added benefits promote a healthy moisture barrier and cell replenishment.

KEY INGREDIENTS:

Camellia Sinensis Extract

Rich in antioxidants and anti-inflammatory properties, this white tea extract fights the breakdown of collagen and reinforces cell structure.

Symphytum Officinale Extract

Also known as Comfrey extract, it contains a molecule called Allatonin that aids in cell growth and repair.

Achillea Millefolium Extract

Commonly known as Yarrow Extract, it boots the oxygen content in skin cells and aids in cell membrane development, strength and durability.

Salvia Officinalis Leaf Extract

Known as Sage extract, it boosts circulation and increases the effectiveness of other ingredients in the cream

HOW TO USE:

Apply a small amount twice daily and massage until fully absorbed. Can be applied to underarm, stomach, sides, hips, thighs, and legs. For optimal results, apply Body Firm™ before working out. When working out, wear compression clothing over areas where Body Firm™ has been applied. Use a body scrub to help absorption and skin penetration.
