

Lighten Up.

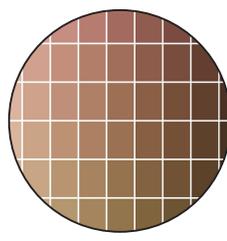

BENEFITS:

Seeing spots? Fade them with any of our skin lightening products. Ranging in strengths, from the all-natural Skin White™ to the strongest, Skin Bleaching Plus™, each of these are guaranteed to give you results. Each product targets skin discoloration ranging from age and sun spots to dark spots on elbows, knees and underarms. All skin lightening products within the Rozgé product line can be used on most areas of the body including elbows, knees, underarms, face, intimate areas and more.

- Contains essential vitamins
- Lightens skin discoloration
- Moisturizes dry skin
- Protects against damaging environmental factors
- Safe for intimate areas
- For all skin types

Natural plant derived extracts provide added benefits. These natural extracts work to protect the skin cells against the adverse effects of ultraviolet radiation. It helps reduce the appearance of age spots, freckles, scars, and discoloration. It also works to prevent premature aging and dryness by creating a moisture barrier to help skin retain moisture.

KEY INGREDIENTS:

Hydroquinone
 Hydroquinone decreases the formation of melanin in the skin. Melanin is responsible for giving skin a brown color.

Citric Acid
 Citric acid promotes new cell turnover which may reduce the appearance of discoloration and areas of uneven tone.

Licorice Extract
 Contains Glabridin which inhibits UVB-induced pigmentation

Mulberry Root Extract
 A naturally occurring triterpenoid found in plants, that protects cells against stress, making it less susceptible to hair loss

Arbutin
 Extracted from the bearberry plant, Arbutin limits melanin production and reduces visible pigmentation through lightening actions.

Kojic Acid
 Kojic acid works by inhibiting melanin production and is known for its antioxidant and antibacterial properties.

CUSTOMER REVIEWS:

"I have tried so many skin lighteners and age spot creams none were as effective as this one. This creme is also moisturizing and my skin looks and feels great! I will continue to use it."

- Rita (Skin Bleaching Plus™)

"I first purchased it because I had a dark sun spot on my cheek. I used it twice a day and in a few weeks it started to fade and before I knew it, it was gone. I also started using it on old pimple scars, I LOVE THIS PRODUCT. I'm back to grab another tube!"

- Mark C. (Skin Bleaching Plus™)

"I have been using this product for yrs now, and I will continue to use it. I have extra oily skin, and this is a great moisturizer that doesn't break out my face; not to mention its great for evening out the complexion as well. I love this stuff..."

- Arlinia D. (Skin Whitening™)

"I first started using this product after my Aesthithician recommended that i use it as a daily part of my skin care routine...I have oily, acne prone dark skin so I was a bit hesitant at first because I have spent hundreds of \$'s on other so called skin lightning products that didn't work at all. After purchasing and using it for a week straight morning and night I saw a DRAMATIC difference in the clarity and radiance of my skin! I begin getting remarkable results and compliments from strangers and close friends and family! Now that I have used it for almost 2months now, my dark spots have become lighter, the under-eye dark circles are completley gone & my skin's tone & texture has improved! Everyday I see more & more improvement. I love this product and will continue to use it."

- TaSheba (Skin White™)

FOR BEST RESULTS:

- Apply a lotion with SPF 30 to lightening area during the day
- Avoid direct sunlight exposure to area
- Before applying, exfoliate area with a body scrub
- Seal lid tightly between uses
